IMPORT HEALTH STANDARD FOR ZOO CROCODILIA HATCHING EGGS FROM AUSTRALIA

Issued pursuant to Section 22 of the Biosecurity Act 1993
Dated: 30 January 2008

USER GUIDE

The information in MAF animal and animal product import health standards is presented in numerically ordered sections with descriptive titles. Sections are grouped into one of four parts, designated alphabetically.

Part A. GENERAL INFORMATION contains sections of general interest, including those relating to the legal basis for MAF import health standards and the general responsibilities of every importer of animals and animal products.

Part B. IMPORTATION PROCEDURE contains sections that outline the requirements to be met prior to and during importation. Whether a permit to import is required to be obtained prior to importation is noted, as are conditions of eligibility, transport and general conditions relating to documentation accompanying the consignment.

Part C. CLEARANCE PROCEDURE contains sections describing the requirements to be met at the New Zealand border and, if necessary, in a transitional facility in New Zealand prior to any consignment being given biosecurity clearance.

Part D. ZOOSANITARY CERTIFICATION contains model health certification which must be completed by the appropriate personnel as indicated in the certification and accompany the consignment to New Zealand.

Part E. APPENDICES contains the list of Crocodilia species deemed by the Environmental Risk Management Authority as present in New Zealand.

PART A. GENERAL INFORMATION

1 IMPORT HEALTH STANDARD

1.1 Pursuant to section 22 of the Biosecurity Act 1993, this document is the import health standard for specified zoo Crocodilia hatching eggs from Australia.

1.2 This import health standard may be reviewed, amended or revoked if there are changes in New Zealand's import policy or the animal health status of the originating country, or for any other lawful reason, at the discretion of the Import Standards Manager.

1.3 Approval for the importation of each consignment of Crocodilia hatching eggs into New Zealand is dependent on containment approval from the Environmental Risk
Management Authority for that particular species of Crocodilia and the consignment meeting the requirements of this import health standard.

2 IMPORTER'S RESPONSIBILITIES

2.1 The costs of MAF in performing functions relating to the importation of Crocodilia hatching eggs shall be recovered in accordance with the Biosecurity Act and any regulations made under that Act.

2.2 All costs involved with documentation, transport, storage and obtaining a Biosecurity direction and clearance shall be borne by the importer or importer’s agent.

2.3 The importer must make all arrangements for transport of the Crocodilia hatching eggs to and within New Zealand. If the planned route is not directly from Australia to the port of entry into New Zealand, the importer must obtain the necessary transit authorities from any third countries on the transport route. The proposed routes and means of travel both to New Zealand and within New Zealand must be advised to and approved by the Import Standards Manager. The vehicles and crates used for transport within New Zealand may be subject to inspection by a New Zealand Official Veterinarian, who may seal the container in which the Crocodilia hatching eggs are transported to the transitional facility.

2.4 If the species of Crocodilia is not listed in Appendix A, species of Crocodilia deemed by the Environmental Risk Management Authority as present in New Zealand, it’s the importer’s responsibility to obtain approval from the Environmental Risk Management Authority (www.ermanz.govt.nz) before importation will be permitted.

3 EQUIVALENCE

The import health standard has been agreed as being suitable for trade between the exporting and the importing countries. It is expected that the Crocodilia hatching eggs will meet the conditions in every respect.

Occasionally it is found that, due to circumstances beyond the control of the importer or exporter, a consignment does not comply completely with this import health standard. In such cases, an application for equivalence may be considered and may be issued at the discretion of the New Zealand Ministry of Agriculture and Forestry, but only if the following information is forwarded by the certifying government's veterinary authority:

3.1 which clause/s of the import health standard cannot be met and how this has occurred;

3.2 the reason the consignment is considered to be of an "equivalent health" status and/or what proposal is made to return the consignment to an equivalent health status as set out in this standard; and

3.3 the reasons why the veterinary authority of the country of origin believe this proposal should be acceptable to the New Zealand Ministry of Agriculture and Forestry and their recommendation for its acceptance.
4 DEFINITION OF TERMS

AQIS
Australian Quarantine Inspection Service

Biosecurity clearance
A clearance under section 26 of the Biosecurity Act (1993) for the entry of goods into New Zealand. (Explanatory Note: Goods given a Biosecurity Clearance by an Inspector are released to the importer without restriction).

Biosecurity direction
Written authority from an inspector, given under section 25 of the Biosecurity Act (1993), to move uncleared goods from a transitional facility or biosecurity control area to another transitional facility, containment facility or biosecurity control area, or to export those goods from New Zealand.

Inspector BA
Means a person who is appointed an inspector under section 103 of the Biosecurity Act (1993). (Explanatory Note: An Inspector is appointed to undertake administering and enforcing the provisions of the Biosecurity Act and controls imposed under HSNO).

MAF
New Zealand Ministry of Agriculture and Forestry.

Official veterinarian
A veterinarian authorised by the Veterinary Administration of the country to perform animal health and/or public health inspections of commodities and, when appropriate, perform certification in conformity with the provisions of the chapter of the Terrestrial Code pertaining to principles of certification.

Terrestrial Code

PART B: IMPORTATION PROCEDURE

5 PERMIT TO IMPORT

5.1 Application for a permit to import must be made at least 30 days prior to the proposed date of importation in writing to the Animal Imports Team, Border Directorate, MAF Biosecurity New Zealand, Ministry of Agriculture and Forestry, PO Box 2526, Wellington, New Zealand.

Email: imports@maf.govt.nz or fax: +64 4 894 0662

5.2 The importer must supply the following information:

5.2.1 name and address of exporter;

5.2.2 number and species of Crocodylia hatching eggs;
5.2.3 date of the proposed importation;

5.2.4 name and address of the containment facility in New Zealand, to which the consignment is to proceed following importation;

5.2.5 port of arrival and route and means of transport to the transitional facility.

5.3 The permit to import will be issued for a single consignment.

6 DOCUMENTATION ACCOMPANYING THE CONSIGNMENT

6.1 The consignment shall be accompanied by the permit to import and all appropriately completed health certification that meets the requirements of PART D. ZOOSANITARY CERTIFICATION.

6.2 It is the importer’s responsibility to ensure that any documentation presented in accordance with the requirements of this import health standard is original (unless otherwise specified) and clearly legible. Failure to do so may result in delays in obtaining biosecurity direction and/or clearance or rejection of the consignment.

[Note: Any requirement for the Convention on International Trade of Endangered Species (CITES) or other conservation related documentation must be met by the exporter/importer and is independent of this certification.]

6.3 The Official Veterinarian of the exporting country must sign, date and stamp each page of the veterinary certificate and any documents that form part of the extended certificate using a different colour ink to the paper and print.

7 ELIGIBILITY FOR IMPORTATION

7.1 Eligibility for importation under this import health standard is confined to hatching eggs of Crocodilia species specified in appendix A, which have been laid in captivity in Australia.

7.2 The eggs must be visibly clean and free from contamination.

7.3 All requirements of this import health standard, including those detailed in the Model Zoosanitary Certificate must be met for the commodity to be eligible for importation.

8 TRANSPORT TO NEW ZEALAND

8.1 Date, expected time of arrival and the flight number or ship’s name must be notified to the New Zealand Official Veterinarian at the airport/port of entry at least 7 days in advance of importation.

8.2 Containers made of timber must meet the requirements of the wood packaging import health standard (refer to www.maf.govt.nz/biosecurity/imports/forests/index.htm)
PART C: CLEARANCE PROCEDURE

9 BIOSECURITY DIRECTION

9.1 Upon arrival in New Zealand an inspector must inspect the Crocodilia hatching eggs and the documentation accompanying them.

9.2 Providing that the documentation meets all requirements noted under PART D: ZOOSANITARY CERTIFICATION and the consignment meets the conditions of ELIGIBILITY, an Inspector under section 25 of the Biosecurity Act 1993, may give a biosecurity direction authorising the Crocodilia hatching eggs to be moved to the containment facility for zoo animals named in the permit to import.

9.3 The Crocodilia and its/their offspring must remain permanently in a registered zoo, and may not be transferred to another zoo without the prior permission of the Import Standards Manager.

PART D: ZOOSANITARY CERTIFICATE

10 NEGOTIATED EXPORT CERTIFICATION

The following Model Zoosanitary Certificate contains the information required by MAF to accompany imports of zoo Crocodilia hatching eggs into New Zealand from Australia:
MODEL ZOO SANITARY CERTIFICATE

Species of Crocodilia: ................................................................. (insert one of the species listed in appendix A)

To: NEW ZEALAND

Import Permit Number: .................................................................................................................................

Exporting Country: AUSTRALIA
Competent Authority: Australian Quarantine and Inspection Service

I: IDENTIFICATION OF EGGS

<table>
<thead>
<tr>
<th>Number</th>
<th>Identification</th>
<th>Species</th>
</tr>
</thead>
</table>

Total number of eggs: .................................................................................................................................

II: ORIGIN OF EGGS

Name and address of exporter: ....................................................................................................................
Place of origin of Crocodilia eggs: ..............................................................................................................
Port of embarkation: .................................................................................................................................

III: DESTINATION OF EGGS

Name and address of consignee: ....................................................................................................................
Flight number or ship’s name: .....................................................................................................................
Port of arrival: ..........................................................................................................................................
IV: SANITARY INFORMATION

VETERINARY CERTIFICATE

I, .................................................................................., an Official Veterinarian authorised by the Australian Quarantine and Inspection Service, certify after due enquiry, with respect to the zoo Crocodilia hatching eggs identified in this zoosanitary certificate, that:

1. Each egg:
   1.1 is of the species: .................................................................
   (insert one of the species listed in appendix A)
   1.2 was laid in a government registered or licensed zoo or wildlife park in Australia
   1.3 only clean eggs have been selected and the eggs were visibly free of contamination at the time of export:

2. For at least 90 days prior to the scheduled date of export, the Crocodilia and the zoos or wildlife parks, in which the Crocodilia reside, have been free of quarantine restrictions.

3. Transport to New Zealand:
   3.1 The vehicle in which the Crocodilia eggs will be transported from the premises of origin to the port of departure were cleaned and disinfected prior to loading using a disinfectant approved by the Australian Quarantine and Inspection Service.
   3.2 If shipped by air, the eggs must be shipped in accordance with the International Air Transport Association (IATA) Live Animal Regulations.
   3.3 The eggs were be packed so as to prevent spillage and placed into new or clean and disinfected containers in the presence of a government veterinary officer before dispatch.
   3.4 For eggs transported by air, the cargo space of the aircraft where the animals are to be transported was sprayed with an approved insecticidal spray prior to departure.
   3.5 The containers were sealed by an Official Veterinarian using seals bearing the unique mark or identification number:……………………………………

Name and Signature of Official Veterinarian    Official stamp and date
