

## *Wollemia nobilis*

**Note:** The entry conditions in this schedule only apply to species in the Plants Biosecurity Index listed under Import Specifications for Nursery Stock “see 155.02.06 under *Wollemia nobilis*, and are additional to those specified in Sections 1, 2 and 3 of the import health standard.

### **1. Type of *Wollemia nobilis* nursery stock approved for entry into New Zealand**

Plants in-vitro only

*Note: Measures for rooted plants are presently being developed.*

### **2. Approved countries**

Australia

### **3. Pests of *Wollemia nobilis***

Refer to the pest list, Section 5

### **4. Entry conditions**

#### **4.1 Post Entry Quarantine**

Not required

#### **4.2 Phytosanitary Requirements**

4.2.1 Phytosanitary certificate required.

4.2.2 Before a phytosanitary certificate is issued, the exporting country NPPO must be satisfied that the following activities required by MAF Biosecurity New Zealand have been undertaken:

The *Wollemia nobilis* plants *in-vitro* in this consignment have been:

- (i) derived from mother plants which were not expressing symptoms of infection by regulated pests prior to the excision of the in-vitro plantlets.
- (ii) derived from explant material which has been surfaced sterilised in a solution of 0.5% sodium hypochlorite and sterile water, or MAF approved alternative treatment.
- (iii) propagated in culture media which is clear.

- (iv) prepared by asexual reproduction (clonal techniques) under sterile conditions.
- (v) inspected and found to comply with the requirements of this import health standard schedule and Basic conditions within MAF Biosecurity Standard 155.02.06 , “Importation of Nursery Stock’.
- (vi) held in a manner to ensure that infestation/reinfestation does not occur following inspection by the NPPO.

4.2.3 The full botanical name of *Wollemia nobilis* must be identified upon the phytosanitary certificate.

#### **4.3 Additional Declarations**

Refer to Section 2.2.2.3 of MAF Biosecurity Standard 155.02.06

### **5. Regulated Pest List for *Wollemia nobilis***

#### **Fungi**

*Phytophthora cinnamomi*  
Arbuscular mycorrhizae  
*Botryosphaeria* sp.  
Ectomycorrhizae

For organisms intercepted that are not listed within this pest list refer to the [Biosecurity Organisms Register for Imported Commodities](#) to determine regulatory status. If the organism is not identified or categorised within the register, please contact [plantimports@maf.govt.nz](mailto:plantimports@maf.govt.nz)
