

Import health standard BNZ-PAFP-IMPRT:

APPENDIX 2

QUESTIONNAIRE TO ACCOMPANY AN APPLICATION TO IMPORT PROCESSED STOCK FOOD OF PLANT ORIGIN.

PRODUCT INFORMATION
1. Type and brand name (if applicable) of the product (If more than one product in a range, with the only difference being ratios, the one application may be used. Otherwise please complete a separate application form for each product):
2. Give full name, address and country of manufacturer (If the product is being supplied by a company which is not the manufacturer please give full details for both):
3. List fully all the ingredients in the product, including percentages for ingredients (attach a separate page if necessary):
4. If any ingredients of this product were manufactured in another country please specify which ingredient(s) and what country:
5. If any ingredients of this product were processed in premises where ruminant protein is stored, used or processed, please specify which ingredients:
6. Does the product contain any ruminant protein (except dairy products)? [NOTE: The Biosecurity (Ruminant Protein) Regulations 1999 prohibit feeding of ruminant protein (except dairy product) to ruminants]
7. Does the product contain any animal protein?

<p>8. Does the product contain any tallow in which total insoluble impurities exceed 0.15%? [NOTE: The Biosecurity (Ruminant Protein) Regulations 1999 prohibit feeding of tallow if the level of insoluble impurities in it exceeds 0.15% by weight.]</p>
<p>9. Name the type of animal(s) for which product is intended:</p>
<p>10. How are the feed ingredients stored at the processing plant prior to and after processing?</p>
<p>11. What measures are taken to exclude birds, rodents and other animals from the plant storage areas?</p>
<p>MANUFACTURING INFORMATION</p>
<p>12. Briefly outline the manufacturing process for the product and state if the material is hammer-milled (Please include the grind size for every ground ingredient included in the product):</p>
<p>13. If the product has been subjected to heat treatment during processing, indicate the minimum core (internal) temperature reached and the length of time this temperature has been maintained:</p>
<p>14. Is steam or pressure applied? Please specify:</p>
<p>15. If the product has been subjected to irradiation indicate where this treatment has been given and the dose:</p>
<p>16. In what form is the finished product? Please state if pelleted, extruded, cubed and size of these pieces, or if a loose mix.</p>

17. What is the method and frequency of cleaning and sterilisation of plant equipment?

18. Are any other products manufactured at the same plant? If so please complete the following:

Premixes / mineral supplements

- Vitamins and / or trace minerals only
- Vitamins, trace and macro minerals and / or amino acids
- Vitamins, trace and macro minerals and / or amino acids and in feed medications or other feed additives
- Licks and / or blocks

Starter feeds

- Milk replacers
- Calf, lamb or other ruminant starter feeds
- Piglet feeds
- Chick or other poultry starter feeds
- Aquaculture starter feeds
- Others: Please specify:

Compound feeds

- Ruminants
- Pig
- Chicken and other poultry
- Horses
- Aquaculture
- Others: Please specify:

19. For feeds intended for ruminants: Is the product produced in premises where ruminant protein is stored, used or processed?

STORAGE AND SHIPMENT

20. State how the product is packed after manufacturing (e.g. size of bags, bulk etc.)

21. Where is the product stored?
22. What measures are taken to exclude birds, rodents and other animals from the product storage area?
23. How is the product to be shipped to New Zealand?
Note: All animal feeds for sale in New Zealand must be labelled in accordance with Sections 13 and 14 of the Biosecurity (Ruminant Protein) Regulations 1999, and the ACVM Regulations 2001, Schedule 4: http://www.legislation.govt.nz
CERTIFICATION
24. Is the product manufactured under a quality assurance program? If so, please specify:
25. Is the product manufactured under the supervision of an independent regulatory authority? If so, which authority and how often:
26. Have you confirmed that your product is exempt from registration under the Agricultural Compounds and Veterinary Medicines (ACMV) Act 1997?
If registration is required please provide evidence that it has been registered. Some feeds and additives to stock feed contain ingredients that require the product to be registered as a veterinary medicine. Registration for some products may be required under the Agricultural Compounds and Veterinary Medicines Act. { http://www.nzfsa.govt.nz/acvm/index.htm }
