

MAF BIOSECURITY NEW ZEALAND
IMPORTING COUNTRIES PHYTOSANITARY
REQUIREMENTS
NEW CALEDONIA

Status: **Approved**

Date: 16 June 2002

Amendment record

Amendment No.	Date:	Nature of amendment:	Approved by:
1.	22 February 1999	Addition of master pest list (2.3), pest lists for fresh kiwifruit and apple fruit (4.1) and minor format changes. Re issue of EPS.	SCO
2.	9 March 1999	Modification to Fresh Cut Flowers and Foliage (Sections 3.2.1 and 4.2.1)	SCO
3.	1 April 1999	Addition of AD requirements for <i>Helianthus</i> spp. (Sections 4.2.1 and 4.2.2)	SCO
4.	29 April 1999	Modification to Maize – Seed (grain) and Nuts for Consumption Section 4.5.3	SCO
5.	16 June 2002	Review and Reissue of EPS	WJH
6.	14 February 2003	Renaming and reformatting of standard. Amendment to Section 2.5 re MPLs.	WJH
7.	29 July 2003	Amendment of conditions for <i>Allium</i> spp. (removal of onion as common name) refer Section 4.1.1. Correction of MAF contact email address, Section 1.1	WJH
8.	1 February 2005	Removal of reference within Section 2.5 to categorised pest list. Amendment of MAF contact details Section 1.1 and 1.2. General reformatting of document.	WJH
9.	6 March 2007	Requirements for peanut and walnut update requirements Sec 3.4.5 and Sec 4.4.3	SW
10.	26 March 2007	Amendment of MAF contact details Section 1.1	SW

Amendment No.	Date:	Nature of amendment:	Approved by:
11.	29 March 2007	Amendment of MAF contact details Section 2.2.5	SW
12.	10 December 2007	Addition of new regulation at 1.3 Amendment of contact details 2.2.4 Amendment of conditions for <i>Arachis hypogea</i> .	BM
13.	29 February 2008	- Temporary amendment of conditions for sweet corn (<i>Zea mays</i>) in S.4.1.1 Fresh fruit and vegetables. - Addition of sections 3.1.4 and 4.1.4 (Processed fruits and vegetables) - Conditions for processed (pre-cooked) sweet corn added.	IV
14.	20 May 2010	Import conditions for dried grains and maize grits (semolina). New Caledonia DAVAR correspondence 2006. Addition of <i>Trogoderma granarium</i> to quarantine pest list.	GI
15.	4 June 2010	Import conditions for whole grains for animal feed; crushed, processed and heat treated (extruded animal feed). New Caledonia DAVAR correspondence June 2010.	GI
16.	23 September 2010	Clarification of additional declaration for <i>Malus</i> spp. fruit. MAFBNZ. Section 4.1.1	GI

DISCLAIMER

The information in this standard is provided on the following basis. The phytosanitary requirements found in this standard may be used as the basis of export certification. However, requirements may be changed by importing countries at any time at short notice or with no notice to New Zealand. This information is provided strictly on the basis that the Crown, the Ministry of Agriculture & Forestry, its statutory officers, employees, agents and all other persons responsible for or associated with the compilation, writing, editing, approval or publication of the information:

1. disclaim any and all responsibility for any inaccuracy, error, omission, lateness, or any other kind of inadequacy, deficiency or flaw in, or in relation to, the information; and
2. without limiting (1) above, fully exclude any and all liability of any kind on the part of all of them, to any person or entity that chooses to rely on this information

Compliance with this standard is not to be taken as a guarantee that any particular goods will be granted access to any overseas market.

1 General Information

1.1 For enquires about this standard email the Plant Exports Group: plantexports@maf.govt.nz

To help Plant Exports process your email please record in the subject line of your email descriptive keywords which are relevant to your enquiry i.e. ICPR enquiry-Country-specific details.

For urgent enquiries phone, fax or email the Plant Exports Group

- Telephone: 0800 008 333 (selecting option 3, then option 4) Fax : 64 4 894 0733; or
- Email: PlantExports

1.2 Scope

This standard specifies New Caledonia's phytosanitary requirements. If a commodity or commodity group is not identified within this ICPR exporters should contact:

- New Caledonia directly to ascertain requirements
- or
- MAF Biosecurity New Zealand (MAFBNZ). (Plant Exports)

Please note, the determination and provision of phytosanitary requirements, for a commodity not identified within an ICPR, is undertaken on a cost recovery basis. A link to the list of Plant Exports Fees and Charges is available on <http://www.biosecurity.govt.nz/regs/exports/plants/fees>

Users of this document are strongly advised to review all sections of the ICPR for the determination of a commodity's phytosanitary requirements.

1.3 Phytosanitary Legislation

The following legislation controls the importation of plants and plant materials into New Caledonia:

- Ruling No. 334 of 11 August 1992
- Ruling No. 112/CP of 18 October 1996
- Ruling No 238 of 15 December 2006

2. General Requirements

ref Annex II

2.1 Prohibitions

The following commodities and or items are prohibited entry from New Zealand unless accompanied by a valid import permit

Scientific Name	Common Name	Plant Part Prohibited
<i>Acacia</i> spp.	Wattle	All (except seeds of non prickly species)
<i>Aeglopsis</i> spp.		Nursery stock & seed
<i>Afraegle</i> spp.		Nursery stock & seed
<i>Agathis</i> spp.	Kauri	Nursery stock
<i>Agave</i> spp.		All
<i>Allium</i> spp.		Nursery stock (reproducible by Seed, except for consumption)
<i>Alocasia</i> spp.	Taro	Nursery stock (except for consumption)
<i>Anacardium occidentale</i>	Cashew	Nursery stock
<i>Ananas</i> spp.	Pineapple	Nursery stock
Annonaceae	Custard apple	Nursery stock
<i>Arachis hypogaea</i>	Peanut	Nursery stock
<i>Araucaria</i> spp.	Monkey puzzle	Nursery stock
Bark (non-treated)	Bark (non-treated)	All
Bambuseae (ornamental grasses)		Nursery stock
Bombaceae (tropical)		Nursery stock
<i>Calamus</i> spp.		All
<i>Capsicum</i> spp.	Pepper	Nursery stock
<i>Carica papaya</i>	Papaya	Nursery stock
<i>Chaenomeles</i> spp.	Flowering quince	All
<i>Cirsium</i> spp.		Dried cut flowers & foliage
<i>Citropsis</i> spp.	Cherry orange	Nursery stock & seed
<i>Citrullus</i> spp.		Nursery stock

Scientific Name	Common Name	Plant Part Prohibited
<i>Citrus</i> spp.	Citrus	Nursery stock & seed
<i>Clausena</i> spp.	Wampi	Nursery stock & seed
<i>Cocos nucifera</i>	Coconut	All (except copra and processed products)
<i>Coffea</i> spp.	Coffee	All (except dried coffee beans)
<i>Colocasia</i> spp.	Taro	Nursery stock (except for consumption)
	Compost (non-treated)	All
<i>Cotoneaster</i> spp.		All
<i>Crataegus</i> spp.	Hawthorn	All
<i>Cucumis</i> spp.	Cucumber	Nursery stock
<i>Cucurbita</i> spp.	Marrow	Nursery stock
<i>Cydonia</i> spp.	Quince	All
<i>Cyperus</i> spp.	Umbrella Sedge	Nursery
<i>Dioscorea</i> spp.	Yams	Nursery stock (except tubers for consumption)
<i>Daemonorops</i> spp.		All
<i>Dimocarpus longan</i>		Nursery stock
<i>Eichhornia crassipes</i>	Water Hyacinth	Nursery
<i>Ensete</i> spp.		Nursery stock (except in-vitro)
<i>Eremocitrus</i> spp.	Desert Kumquat	Nursery stock & seed
<i>Eriostemon</i> spp.	Wax flower	Nursery stock & seed
<i>Eucalyptus</i> spp.	Gum tree	Nursery stock
<i>Euphoria longan</i>		Nursery stock
	Forest species (Genera not specified)	Nursery stock
<i>Fortunella</i> spp.	Kumquat	Nursery stock & seed
<i>Glycine</i> spp.	Soybean	Nursery stock

Scientific Name	Common Name	Plant Part Prohibited
<i>Gossypium</i> spp.	Cotton	All (except processed products)
Gramineae		Nursery stock (straw, unhulled grain)
	Growing media including, Hay, humus, manure, soil	All
<i>Harrisia</i> spp.	Harrisia	All
<i>Helianthus</i> spp.	Sunflower	Nursery stock
<i>Heliconia</i> spp.	False Bird-of-Paradise	Nursery stock (except in-vitro)
	In-vitro cultures of any species in this list (unless mentioned elsewhere)	All
<i>Ipomoea batatas</i>	Kumara	Nursery stock (except tubers for consumption)
<i>Kortalsia</i> spp.		All
<i>Litchi chinensis</i>	Lychee	Nursery stock
<i>Lycopersicon</i> spp.	Tomato	Nursery stock
<i>Mangifera indica</i>	Mango	Nursery stock
<i>Manihot esculenta</i>	Cassava	Nursery stock (except tubers for consumption)
Manure	Manure	All
<i>Mellicoccus bijugatus</i>	Spanish lime	Nursery stock
<i>Musa</i> spp.	Banana	All
<i>Nephelium lappaceum</i>	Rambutan	Nursery stock
<i>Orchidantha</i> spp.		Nursery stock (except in-vitro)
<i>Opuntia</i> spp.	Prickly Pear	All
<i>Pamburus</i> spp.		Nursery stock & seed
<i>Passiflora</i> spp.	Passion fruit	Nursery stock
<i>Persea americana</i>	Avocado	Nursery stock
<i>Phaseolus</i> spp.	Bean	Nursery stock
<i>Pinus</i> spp.	Pine	Nursery stock
<i>Piper nigrum</i>	Pepper	Nursery stock

Scientific Name	Common Name	Plant Part Prohibited
<i>Pisum</i> spp.	Pea	Nursery stock
<i>Poncirus</i> spp.	Trifoliolate orange	Nursery stock & seed
<i>Pseudotsuga</i> spp.	Douglas Fir	Nursery stock
<i>Pyracantha</i> spp.	Fire Thorn	All
<i>Ravenala</i> spp.	Traveller's Palm	Nursery stock (except in-vitro)
<i>Saccharum officinarum</i>	Sugar cane	All
<i>Salvinia</i> spp.	Salvinia	All
	Soil	All
<i>Solanum</i> spp.		Nursery stock (except potato tubers)
<i>Sorbus</i> spp.	Mountain ash	All
Sterculiaceae		Nursery stock (tropical species)
<i>Stranvaesia</i> spp.	Stransvaesia	All
<i>Streilitiza</i> spp.	Bird-of-Paradise	Nursery stock (except in-vitro)
<i>Theobroma</i> spp.	Cacao	All (except roasted beans)
Tiliaceae (tropical)		Nursery stock
<i>Vicia</i> spp.	Vetch	Nursery stock
	Wood which has not been de-barked	All
	Wood which has not been treated	All
<i>Xanthosoma</i> spp.	Taro	Nursery stock (except for consumption)

2.2 Phytosanitary Import Permits

2.2.1 Phytosanitary import permits state the phytosanitary requirements for importation

2.2.2 Phytosanitary import permits are required for the following commodities:

- Some genera of fresh fruit and vegetables
- Nursery stock
- Seeds for sowing, consumption and processing
- Growing media and packing materials
- Miscellaneous items

2.2.3 Phytosanitary import permits are not required for:

- Dried fruit and vegetables
- Frozen fruit and vegetables
- Fresh cut flowers and foliage
- Dried cut flowers and foliage
- Dried grains and flours

2.2.4 Phytosanitary import permits may be requested from the New Caledonia Agriculture Service:

Direction des Affaires Veterinaires Alimentaires et Rurales,
Service d'Inspection Veterinaire Alimentaire et Phytosanitaire
BP 256 - 98845, Noumea
New Caledonia

Telephone: 00 687 24 37 45

Facsimile: 00 687 25 11 12

Email: sivap@gouv.nc

2.2.5 Please note conditions of import or additional declarations identified upon phytosanitary import permits received from New Caledonia may differ from those identified within this standard. Conditions of import identified herein are accurate at the time of this standards publication. Where import conditions identified upon an import permit differ from that identified within this standard, the permit conditions take precedence.

Where conditions of export identified upon an import permit differ from that stated within this ICPR, please contact Plant Exports, refer Section 1.1

2.3 Phytosanitary Certificates

ref Art 7

2.3.1 Phytosanitary certificates are required to accompany consignments of:

- Fresh fruit and vegetables
- Fresh cut flowers and foliage
- Nursery stock
- Seed for sowing, consumption and processing
- Miscellaneous items

2.3.2 Phytosanitary certificates are not required to accompany consignments of:

- Dried fruit and vegetables
- Frozen fruit and vegetables
- Dried cut flowers and foliage

2.3.3 The phytosanitary certificate that accompanies the consignment, must be either the original or a certified copy.

2.3.4 Phytosanitary certificates must be issued no more than 14 days prior to shipment.

2.4 Quarantine Pests

ref Annex I

Scientific Name

Common Name

Insects

<i>Acrolepiopsis assectella</i>	Pear moth
<i>Acromyrmex octospinosus</i>	Leaf cutting ant
<i>Acromyrmex</i> spp.	Leaf cutting ant
<i>Adoretus sinicus</i>	Defoliating beetle
<i>Adoretus versutus</i>	Defoliating beetle
<i>Agromyza oryzae</i>	Rice leaf miner
<i>Aleurocanthus cocos</i>	Coconut whitefly
<i>Aleurocanthus spiniferus</i>	Orange spiny whitefly
<i>Aleurocanthus woglumi</i>	Citrus blackfly
<i>Alissonotum piceum</i>	Black Asian beetle
<i>Amauromyza maculosa</i>	Chrysanthemum leaf miner
<i>Amblypelta cocophaga</i>	Coconut spotting bug
<i>Anastrepha fraterculus</i>	South American fruit fly
<i>Anastrepha grandis</i>	South American cucurbit fruit fly
<i>Anastrepha serpentina</i>	Sapote fruit fly
<i>Asynonychus cervinus</i>	Fuller's rose weevil
<i>Atherigona</i> spp.	Muscid fly
<i>Atta cephalotes</i>	Leaf cutting ant
<i>Atta sexdens</i>	Leaf cutting ant
<i>Bactrocera cucurbitae</i>	Melon fruit fly
<i>Bactrocera dorsalis</i>	Oriental fruit fly
<i>Bactrocera facialis</i>	Fruit fly
<i>Bactrocera frauenfeldi</i>	Frauenfeld's fruit fly
<i>Bactrocera kirki</i>	Kirk's fruit fly
<i>Bactrocera neohumeralis</i>	Fruit fly
<i>Bactrocera passiflorae</i>	Fijian fruit fly
<i>Bactrocera trilineola</i>	Fruit fly
<i>Bactrocera xanthodes</i>	Fruit fly
<i>Bemisia tabaci</i>	Poinsettia white fly
<i>Ceratitis capitata</i>	Mediterranean fruit fly
<i>Ceratitis coffeae</i>	Coffee fruit fly
<i>Ceratitis cosyra</i>	Fruit fly
<i>Ceratitis rosa</i>	Natal fruit fly
<i>Chilo partellus</i>	Sugarcane driller
<i>Chilo</i> spp.	Maize driller
<i>Cnephasia jactatana</i>	Black lyre moth
<i>Comstotachis perniciosus</i>	San José louse
<i>Conotrachelus</i> spp.	Avocado weevil
<i>Coptotermes formosanus</i>	Termite
<i>Costelytra zealandica</i>	Grass grub
<i>Ctenopseustis herana</i>	Brownheaded leafroller
<i>Ctenopseustis obliquana</i>	Brownheaded leafroller
<i>Cydia molesta</i>	Oriental fruit moth
<i>Cydia pomonella</i>	Codling moth

Scientific Name

Cylas formicarius
Cylas puncticollis
Delia antiqua
Delia brassica
Delia platura
Dialeurodes citri
Dictyotus caenosus
Epiphyas postvittana
Erionota thrax
Eucolaspis brunnea
Heilipus lauri
Helicoverpa zea syn. *Heliothis zea*
Heliiothrips haemorrhoidalis
Hemiberlesia rapax
Henosepilachna spp.
Heteronychus arator
Heteronychus licas
Hylastes ater
Idiocerus spp.
Iridomyrmex humilis
Lampestis equestris
Laspeyresia nigricana
Leptinotarsa decemlineata
Liriomyza huidobrensis
Liriomyza trifolii
Listronotus bonariensis
 Lyonetiidae
Mastotermes darwiniensis
Megastes grandalis
Megastes pusialis
Nysius huttoni
Oecophylla spp.
Ophiomyia phaseoli
Opogona sacchari
Oryctes boas
Oryctes monoceros
Oryctes rhinoceros
Ostrinia furnicalis
Papuana armicollis
Papuana cheesemanae
Papuana huebneri
Papuana inermis
Papuana uninodis
Papuana woodlarkiana
Pentalonia nigronervosa
Perkinsiella saccharidica
Phlyctinus callosus
Planotortrix excessana
Planotortrix octo
Popilia japonica
Prays citri
Prays endocarpa
Prostephanus truncatus
Pseudococcus affinis
Pseudococcus calceolariae
Pseudococcus similans
Psila rosae

Common Name

Potato weevil
 Potato weevil
 Onion fly
 Cabbage fly
 Bean/maize fly
 Citrus whitefly
 Brown shield bug
 Lightbrown apple moth
 Banana defoliating caterpillar
 Bronze beetle
 Seed weevil
 Corn earworm
 Greenhouse thrips
 Greedy scale
 Defoliating ladybird
 Black beetle
 Black maize/wheat beetle
 Black pine bark beetle
 Mango leafhopper
 Argentine ant
 Bulb and onion fly
 Pea moth
 Colorado beetle
 Pea leaf miner
 Clover leaf miner
 Argentine stem weevil

 Termite
 Sweet potato stem borer
 Sweet potato moth borer
 Wheat bug
 Ant
 Bean fly
 Sugarcane bud moth
 Rhinoceros beetle
 Rhinoceros beetle
 Rhinoceros beetle
 Asian corn borer
 Taro beetle
 Taro beetle
 Taro beetle
 Taro beetle
 Taro beetle
 Taro beetle
 Taro beetle
 Banana aphid
 Sugarcane plant hopper
 Garden weevil
 Greenheaded leafroller
 Greenheaded leafroller
 Japanese beetle
 Citrus fruit bud moth
 Bud moth
 Maize capuchin bug
 Obscure mealybug
 Citrophilus mealybug
 Mealybug
 Carrot rust fly

Scientific Name

Rhynchophorus spp.
Quadraspidiotus ostreaeformis
Quadraspidiotus perniciosus
Scapanes australis
Scolypopa australis
Scirtothrips citri
Sogatella furcifera
Stenoma catchifer
Stephanitis typica
Sternochetus frigidus
Thrips obscuratus
Tortricinae spp.
Trioza erythrae
Trogoderma granarium
Viteus vitifolii

Mites

Aceria litchi
Aceria mangiferae
Mononychellus tanajoa
Panonychus citri
Panonychus ulmi

Nematodes

Aphelenchoides besseyi
Aphelenchoides oryzae
Ditylenchus angustus
Ditylenchus destructor
Ditylenchus dipsaci
Globodera pallida
Globodera rostochiensis
Helicotylenchus spp.
Heterodera glycines
Heterodera schachtii
Pratylenchus coffeae
Rhadinaphelenchus cocophilus
Rhadopholus citrophilus
Scutellonema bradys

Fungi

Alternaria alternata
Botryodiplodia spp.
Botryosphaeria dothidea
Botryosphaeria obtusa
Botryosphaeria parva
Ceratostomella paradoxa
Colletotrichum coffeanum f.sp. *virulans*
Colletotrichum fragariae
Crinipellis perniciosus syn. *Marasmius perniciosus*
Deuterophoma tracheiphila
Diaporthe perniciosus
Eutypa lata
Exobasidium vexans
Fusarium oxysporum f.sp. *cubense* race IV
Gibberella baccata
Gibberella xylarioides

Common Name

Palm weevil
Oystershell scale
San Jose scale
Beetle
passionvine hopper
Citrus thrips
White backed plant hopper
Avocado seed caterpillar
Banana seed bug
Mango weevil
NZ flower thrips
leafrollers
Citrus psyllid
Khapra beetle
Vine phylloxera

Lychee mite
Mango mite
Manioc mite
Citrus red mite
European red mite

Leaf nematode
Rice leaf nematode
Rice stem nematode
Potato nematode
Stem and bulb nematode
Potato cyst nematode
Golden potato cyst nematode
Spiral nematode
Soybean cyst nematode
Beet cyst nematode
Coffee lesion nematode
Coconut red ring nematode
Citrus burrowing nematode
Spiral yam nematode

Fruit rot
Coconut defoliating disease
White rot
Black rot
Ripe spot
Pineapple rot
Coffee canker
Strawberry anthracnose
Cacao tree witches broom
Citrus mal seco disease
Phomopsis canker
Deadarm canker of vines
Tea blister blight
Banana wilt
Fruit rot
Coffee sudden death blight

Scientific Name

Hemileia vastatrix
Monilinia fructicola
Monilinia laxa
Mycosphaerella fijiensis
Mycosphaerella fijiensis f.sp. *difformis*
Peronosphytophthora litchii
Peronosclerospora maydis
Peronosclerospora philippinensis
Peronosclerospora sacchari
Peronosclerospora sorghi
Peronospora destructor
Peronospora manshurica
Peronospora tabaci
Phomopsis helianthi syn. *Diaporthe helianthi*
Plasmopara brassicae
Plasmopara halstedii
Phytophthora cactorum
Phytophthora cinnamomi
Phytophthora colocasiae
Phytophthora fragariae
Phytophthora megasperma f.sp. *glycinea*
Pseudocercospora purpurea
Puccinia arrachidis
Puccinia helianthi
Puccinia horiana
Puccinia striiformis
Pyricularia oryzae
Sclerospora macrospora
Sphaerotheca pannosa
Sphaceloma perseae
Trachyphaera fructigena
Urocystis cepulae
Uromyces transversalis
Ustilago maydis
Valsa leucostoma

Bacteria

Agrobacterium tumefaciens
Citrus greening disease
Clavibacter michiganensis pv. *michiganensis*
Clavibacter michiganensis pv. *sepedonicus*
Corynebacterium flaccumfasciens
Erwinia ananas
Erwinia chrysanthemi
Erwinia papayae
Erwinia stewartii
Erwinia tracheiphila
Pseudomonas gladioli pv. *alliicola*
Pseudomonas gladioli pv. *gladioli*
Pseudomonas rubrilineans
Pseudomonas syringae pv. *lachrymans*
Pseudomonas syringae pv. *passiflorae*
Pseudomonas syringae pv. *persicae*
Pseudomonas syringae pv. *pisi*
Pseudomonas syringae pv. *syringae*
Pseudomonas syringae pv. *mors-prunorum*
Pseudomonas syringae pv. *tabaci*

Common Name

Coffee rust
Brown rot
Brown rot
Banana black rot
Black sigatoka disease
Lychee mildew
Maize downy mildew
Philippine downy mildew of maize
Sugarcane downy mildew
Sorghum downy mildew
Onion downy mildew
Soybean downy mildew
Tobacco downy mildew
Sunflower blight
Downy mildew of brassicas
Downy mildew
Phytophthora fruit rot
Phytophthora root rot
Phytophthora root rot of taro
Phytophthora root rot of strawberry
Phytophthora root rot of soybean
Avocado purple rot
Peanut rust
Sunflower rust
Chrysanthemum rust
Wheat stripe rust
Rice blast
Maize crazy top, Rice yellow wilt
Powdery mildew
Avocado scab
Banana cigar end disease
Onion smut
Gladiolus rust
Maize boil smut
Valsa canker

Crown gall

Tomato bacterial canker
Potato ring rot disease
Bacterial blight of beans
Pineapple fruit rot
Bacterial blight of Chrysanthemum
Bacterial blight of Papaya
Bacterial blight of Corn
Bacterial blight of Cucurbits
Leaf spot/blight of onion
Leaf spot/blight of gladioli
Red stripe/top rot of sugar cane
Cucurbit angular leafspot
Bacterial necrotic spot of passionfruit
Leaf spot /canker of peach
Bacterial blight of peas
Blast/blister spot
Bacterial blight/canker of stonefruit
Bacterial blight of tobacco

Scientific Name

Ralstonia (Pseudomonas) solanacearum race II
Xanthomonas campestris pv. *begoniae*
Xanthomonas campestris pv. *citri*
Xanthomonas campestris pv. *dieffenbachiae*
Xanthomonas campestris pv. *mangiferae-indicae*
Xanthomonas campestris pv. *manihotis*
Xanthomonas campestris pv. *oryzae*
Xanthomonas campestris pv. *passiflorae*
Xanthomonas campestris pv. *pruni*
Xanthomonas campestris pv. *pisi*
Xanthomonas campestris pv. *vasculorum*
Xanthomonas campestris pv. *vesicatoria*
Xanthomonas fragariae
Xylella fastidiosa
Xylophilus ampelinus syn. *Xanthomonas ampelina*

Common Name

Banana moko disease
Begonia bacterial blight
Citrus canker
Dieffenbachia blight
Mango blight
Cassava bacterial blight
Bacterial blight of rice
Passionfruit bacterial leafspot
Stonefruit fruit spot
Bacterial blight of peas
Sugarcane gummosis
Bacterial spot of pepper and tomato
Strawberry angular leafspot
Pierce's disease
Grape vine bacterial gall

Viruses, Mycoplasmas and Other Diseases

Alomae and Bobone virus
Avocado sun blotch viroid
Banana bract virus
Banana bunchy top virus
Banana elephantitis virus
Banana infectious chlorosis virus syn. Cucumber mosaic virus
Banana streak virus
Barley stripe mosaic virus
Barley yellow dwarf mosaic virus
Bean common mosaic virus
Bean yellow mosaic virus
Cacao swollen shoot virus
Cacao yellow mosaic virus
Cape St. Paul wilt
Cassava African mosaic virus
Cassava brown streak virus
Citrus blight (unknown causal agent)
Citrus cachexia
Citrus tristeza virus
Coconut cadang-cadang viroid
Coconut foliage wasting disease (viroid or virus)
Coconut lethal yellowing disease (mycoplasma)
Coffee ringspot virus
Cowpea mild mottle virus
Cowpea mosaic virus
Cucumber green mottle virus
Cucumber mosaic virus
Cymbidium mosaic virus
Dioscorea green banding virus
Dioscorea internal browning virus
Grape golden flavescence phytoplasma
Kaincop' disease
Lettuce mosaic virus
Maize streak virus
Odontoglossum orchid ringspot virus
Papaya bunchy top phytoplasma
Papaya distortion ringspot virus syn. Papaya ringspot virus
Papaya mosaic virus
Papaya ringspot virus
Passiflora ringspot virus syn. Passionfruit ringspot virus

Virus of Taro

Scientific Name

Passionfruit woodiness virus syn. Passionfruit mosaic virus
Peanut clump virus
Phytomonas spp.
Potato spindle tuber viroid
Potato yellow dwarf virus
Potato yellow vein virus
Rice tungro virus
Sharka virus
Spiroplasma citri
Strawberry crinkle virus
Strawberry latent C virus
Strawberry ringspot virus
Strawberry vein banding virus
Strawberry yellow edge virus
Strawberry witch's broom phytoplasma
Sugar cane Fiji virus
Sugar cane mosaic virus
Sugar cane streak monogeminivirus
Sweet potato feathery mottle virus
Sweet potato mild mottle virus
Sweet potato yellow dwarf virus
Tobacco ringspot virus
Tobacco streak virus
Tomato spotted wilt virus
Tomato bunchy top virus
Tomato bushy stunt virus
Tomato leaf curl virus syn. Tobacco leaf curl virus
Vanilla mosaic virus
Watermelon mosaic 1 virus (Cucurbitae and papayas)
Watermelon mosaic 2 virus (Cucurbitae)
Yam mosaic virus

Common Name

Coconut and oil palm heart rot

Citrus spiroplasma

Weeds

Chromolaena odorata
Clerodendrum philippinum
Cyperus spp.
Eichornia crassipes
Lantana camara
Mikania micrantha
Mimosa invisa
Mimosa pigra
Myconia colvensis

2.5 Maximum Pest Limits (MPLs)

For all commodities exported to New Caledonia requiring phytosanitary certificates, the MPL's are:

Quarantine pests* specified by New Caledonia	0.5%
Soil	25g/600unit

*Quarantine pests for New Caledonia include organisms identified within:

- Section 2.4 of this standard
- Additional declarations
- Phytosanitary import permit

2.6 Inspection on Arrival

ref Art 4

All consignments will be subject to inspection upon arrival

2.7 Ports of Entry

ref Art 10

Permitted ports of entry are

Airport

- Magenta
- Tonntouta

Port

- Noumea

Post Centre

- Noumea

2.8 Re-exported Products

ref Art 6&7

Consignments of plants and plant products not of New Zealand origin which are re-exported to New Caledonia must be accompanied by:

- the original phytosanitary certificate (or a certified copy) issued by the country of origin

And

- a phytosanitary certificate (re-export certificate) issued by the New Zealand Ministry of Agriculture and Forestry no more than 14 days prior to export

3. Commodity Class Requirements

ref Annex IV

3.1 Fruit and Vegetables

3.1.1 Fresh Fruit and Vegetables

Conditions:

Phytosanitary import permit required for some genera only. Phytosanitary certificate required for all. Additional declaration required and or treatment required. Treatment is to be endorsed upon the phytosanitary certificate where applicable. Refer Section 4.1.1 for commodity specific requirements.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitidis capitata*”
or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment

3.1.2 Dried Fruit and Vegetables

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required. Inspection upon arrival.

3.1.3 Frozen Fruit and Vegetables

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required.

3.1.4 Processed Fruit and Vegetables

Conditions:

Generic conditions of entry for processed fruit and vegetables are being clarified with New Caledonia's phytosanitary authorities.

3.2 Cut Flowers

3.2.1 Fresh Cut Flowers and Foliage

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Treatment required. No additional declarations are required unless specified within Section 4.2.1. Product will be treated upon arrival if pests are identified.

Treatment:

Insecticide treatment required.

3.2.2 Dried Cut Flowers and Foliage

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required. Inspection upon arrival. Product will be treated upon arrival if pests are identified.

Note Grasses in sprays or tufts and *Cirsium* are **prohibited**

3.3 Nursery Stock

Plants and parts of plants for propagation (other than seeds)

3.3.1 Bulbs, tubers and rhizomes (for propagation)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Bulbs must be in a vegetative state. Must be free of soil, roots, stems and leaves. For bulbs, tubers and rhizomes not identified within Section 2.1, the following additional declaration or treatment is required. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Additional declaration:

Bulbs are free from nematode types *Ditylenchus* spp., *Pratylenchus* spp., and *Xiphinema* spp.”

or

Have undergone a nematicide treatment (fumigation or soaking in hot water)

3.3.2 Whole Plants (Fruit)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required. Plants to be dormant if possible (no leaves, flowers or fruit). Material must be free of soil. Refer Section 4.3.2 for commodity specific requirements. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Treatment:

Treatment with fungicide and insecticide

3.3.3 Whole Plants (Ornamental)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required. Material must be free of soil. Plants to be bare rooted or packed in authorised substrate, which must be disinfected with an insecticide and nematicide (aldicarb, ethoprophos or oxamyl). Potted plant seedlings must be less than 25 cm high. Refer Section 4.3.2 for commodity specific requirements. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Treatment:

Treatment with fungicide and insecticide

3.3.4 Tissue Culture

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Additional declaration may be required. For plant genera other than those that are subject to special declarations or are prohibited, the plantlets are to be cultured on sterile media without antibiotics.

Additional Declaration:

“Plants free from pathogenic organisms”

3.3.5 Bonsai Plants

Conditions: (Plant species other than those, which are prohibited or subject to other additional declarations)

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required. Treatment is to be endorsed upon the phytosanitary certificate

Treatment:

Bare rooted and potted plants require insecticide, fungicide and nematicide (aldicarb, ethoprophos, oxamyl etc) treatment by immersion.

3.4 Seeds (grain) and Nuts

3.4.1 Seeds for Sowing (General)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Refer Sections 4.4.1 and 4.4.2 for commodity specific requirements.

3.4.2 Seed for Sowing (Forage Grasses)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate. Treatment required. Refer Sections 4.4.1 and 4.4.2 for commodity specific requirements. Certificate of purity and germination required. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Treatment:

Insecticide treatment required

3.4.3 Seed for Sowing (Forage Legumes)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Additional declaration required. Treatment required. Refer Sections 4.4.1 and 4.4.2 for commodity specific requirements. Certificate of purity and germination required. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Additional declaration

"Seeds certified free from *Corynebacterium michiganense* ssp. *lasidiosum*"

Treatment:

Insecticide and fungicide treatment required.

3.4.4 Seed for Sowing (Conifers)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Treatment:

Insecticide and fungicide treatment (by soaking) required.

3.4.5 Seeds (grain) and Nuts for Consumption

Conditions:

Phytosanitary import permit may be required. Phytosanitary certificate required. Refer Section 4.4.3 for commodity specific requirements.

3.5 Growing Media and Packing Material

3.5.1 Growing Media

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Refer Section 4.5 for commodity specific requirements

Permitted media types for growing support of unpotted (bare-rooted) plants

- charcoal
- cork plates
- sawdust
- tree fern (plates/slabs)
- wood crates / baskets

Permitted media types for potted seedlings

- pure peat / peat moss
- rockwool
- fibreglass
- perlite
- vermiculite

Prohibited media

- hay, humus, manure, and soil

3.5.2 Packing Material

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Packages must be free of litter, earth and leaves, or other prohibited organic matter.

Permitted media for packing of unpotted plants

- charcoal
- cork plates
- sawdust
- tree fern (plates / slabs)
- wood crates / baskets

3.6 Miscellaneous

Miscellaneous plant products including animal feed and plant fibres.

Conditions:

Phytosanitary import permit required unless otherwise specified in Section 4.6. Phytosanitary certificate required. Treatment may be required and will be specified within the import permit.

4. Commodity Specific Requirements

4.1 Fruit and Vegetables

4.1.1 Fresh Fruit and Vegetables

Refer to Section 3.1.1 Commodity Class Requirements

Actinidia deliciosa

Kiwifruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *Bactrocera dorsalis*, and *Ceratitis capitata*”
or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Allium spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. Bulbs must be dried and must not of germinated.

Additional Declaration:

“Bulbs are from an area free from *Urocystis cepulae*”

and

“Bulbs inspected and found free from *Peronospora destructor*”

Alocasia spp.

Taro

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tubers must be cut 10-15 cm below the neck, stripped of any soil, washed, and fumigated or peeled and frozen. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Additional Declaration:

“New Zealand is free from Alomae and Bobone viruses, *Hirshmaniella miticosa*, *Phytophthora colocasiae* and *Papuana* spp.”

or

the consignment must be fumigated with methyl bromide

or

peeled and frozen

Ananas comosus

Pineapple

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Annona cherimola

Cherimoya

Conditions:

Plant import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Apium graveolens

Celery

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Asparagus officinalis

Asparagus

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Beta vulgaris

Beet

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Brassica spp.

Brassica

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Capsicum annuum

Capsicum

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Carica papaya

Papaya

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Cichorium intybus

Chicory

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Citrullus lanatus

Watermelon

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Citrus spp.

Citrus

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

and

“New Zealand is free from *Xanthomonas campestris* pv. *citri*”

Cocos nucifera

Coconut

Conditions:

Prohibited (except copra and processed products)

Colocasia esculenta

Taro

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tubers must be cut 10-15 cm below the neck, stripped of any soil, washed, and fumigated or peeled and frozen. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Additional Declaration:

“New Zealand is free from Alomae and Bobone viruses, *Hirshmaniella miticosa*, *Phytophthora colocasiae* and *Papuana* spp.”

or

the consignment must be fumigated with methyl bromide

or

peeled and frozen

Cucumis melo

Melon

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Cucumis spp.

Cucurbits

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Cydonia oblonga

Quince

Conditions:

Prohibited

Cynara scolymus

Artichoke (Globe)

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Cyphomandra betacea

Tamarillo

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Daucus carota

Carrot

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Dioscorea spp.

Yams

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tubers washed and free of soil and fumigated with methyl bromide or peeled and frozen.

Additional Declaration:

"New Zealand is free from *Scutellonema bradys* and *Papuana* spp."

or

Treatment with insecticide and nematicide to eliminate the above organisms

Diospyros kaki

Persimmon

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Eriobotrya japonica

Loquat

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Feijoa sellowiana

Feijoa

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Ficus spp.

Figs

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Fortunella spp.

Kumquat

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

and

"New Zealand is free from *Xanthomonas campestris* pv. *citri*"

Fragaria spp.

Strawberries

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Ipomoea batatas

Kumara

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Tubers washed and clean (soil removed).

Lactuca sativa

Lettuce

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Lentinus edodes

Shiitake Mushroom

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Must be clean, free from soil, compost, (culture medium), humus and leaves.

Lycopersicon esculentum

Tomato

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Malus spp.

Apples

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required. Fruit must be without leaves and shoots.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

and if applicable

"Produce does not meet negotiated MPLs and is subject to inspection on arrival and possible fumigation" Note: (only to be applied if the MPL exceeds 0.5% at inspection in New Zealand, agreed policy New Caledonia and New Zealand)

Mangifera indica

Mango

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declarations:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

and

"New Zealand is free from *Xanthomonas campestris* pv. *mangifera*"

Manihot esculenta

Cassava

Conditions:

Phytosanitary import permit required. Phytosanitary certificate, and additional declaration required. Roots carefully washed of any trace of soil, or roots peeled and frozen.

Additional Declaration:

"The area of production is free from *Xanthomonas campestris* pv. *manihoti*, *Xanthomonas cassavae*, *Commoa cassava*, Cassava mosaic virus and African cassava mosaic virus"

Morus alba

White Mulberry

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Oxalis tuberosum

Yam (NZ)

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tubers washed and free of soil and fumigated with methyl bromide or peeled and frozen.

Additional Declaration:

"New Zealand is free from *Scutellonema bradys* and *Papuana* spp."

or

Treatment with insecticide and nematicide to eliminate the above organisms

Passiflora edulis

Passionfruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

"New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*"

or

"Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months"

or

an approved treatment used

Pastinaca spp.

Parsnips

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Persea americana

Avocado

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional Declarations:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

and

“Produced in orchards recognised as free from Avocado sunblotch viroid”

Petroselinum crispum

Parsley

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Phaseolus vulgaris

Bean

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Physalis peruviana

Cape Gooseberry

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used.

Pisum spp.

Pea

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Prunus spp.

Stonefruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Pyrus communis & P. pyrifolia

Pear & Nashi

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Raphanus sativus

Radish

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Rheum rhabarbarum

Rhubarb

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Ribes spp.

Currants

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Rubus spp.

Brambles

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used.

Solanum melongena var. esculentum

Egg Plant

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Solanum muricatum

Pepino

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Solanum tuberosum (for consumption)

Potato

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tubers must be free from soil, not germinated on arrival.

Additional Declaration:

“Tubers are from areas free from *Corynebacterium sepedonicum*, *Ditylenchus destructor*, *Globodera rostochiensis*, *G. pallida* and *Synchytrium endobioticum*”

Please note: *Corynebacterium sepedonicum* syn. *Clavibacter michiganensis* pv. *sepedonicus*

Spinacia oleracea

Spinach

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Vitis vinifera

Grape

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration required and or treatment required.

Additional declaration:

“New Zealand is free from *Bactrocera cucurbitae*, *B. dorsalis*, and *Ceratitis capitata*”

or

“Fruit produced in orchards situated at least 80 km from any place where fruit fly has been discovered during the last 12 months”

or

an approved treatment used

Xanthosoma spp.

Taro

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tubers must be cut 10-15 cm below the neck, stripped of any soil, washed, and fumigated or peeled and frozen. Treatment is to be endorsed upon the phytosanitary certificate where applicable.

Additional Declaration:

"New Zealand is free from Alomae and Bobone viruses, *Hirshmaniella miticosa*, *Phytophthora colocasiae* and *Papuana* spp."

or

the consignment must be fumigated with methyl bromide

or

peeled and frozen

Zea mays

Sweet corn

Conditions:

Conditions of entry for fresh sweet corn are being clarified with New Caledonia's phytosanitary authorities.

4.1.2 Dried Fruit and Vegetables

Refer Section 3.1.2

4.1.3 Frozen Fruit and Vegetables

Refer Section 3.1.3

4.1.4 Processed Fruit and Vegetables

Zea mays

Sweet corn - precooked

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

4.2 Cut Flowers and Foliage

4.2.1 Fresh Cut Flowers and Foliage

Chrysanthemum spp.

Chrysanthemum

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. Insecticide treatment by fumigation, spraying or dipping required.

Additional Declaration:

"The flowers are free from *Puccinia horiana* (Chrysanthemum white rust) and free from Chrysanthemum Stunt Virus"

or

"Devitalised with glyphosate" - Devitalisation (if conducted): Treatment = stems are dipped for twenty minutes to a depth of at least 35 cm in a solution of 0.5% Glyphosate.

Coniferae

Conifers

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Insecticide and fungicide treatment required.

Dendranthema spp.

Chrysanthemum

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. Insecticide treatment by fumigation, spraying or dipping required.

Additional Declaration:

"The flowers are free from *Puccinia horiana* (Chrysanthemum white rust) and free from Chrysanthemum Stunt Virus"

or

"Devitalised with glyphosate" - Devitalisation (if conducted): Treatment = stems are dipped for twenty minutes to a depth of at least 35 cm in a solution of 0.5% Glyphosate.

Helianthus spp.

Sunflower, Jerusalem Artichoke

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

"Area of origin free from *Plasmopara halstedii* (sunflower mildew)"

4.2.2 Dried Cut Flowers and Foliage

Refer Section 3.2.2

4.3 Nursery Stock

Refer Section 3.3

4.3.1 Bulbs/tubers/rhizomes (for propagation)

Refer Section 3.3.1

4.3.2 Whole Plants

Refer Sections 3.3.2 and 3.3.3

Abutilon spp.

Flowering Maples

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Acacia spp.

Wattles

Conditions:

Prohibited

Acer spp.

Maples

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Acmena smithii

Lillypilly

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Actinidia deliciosa

Kiwifruit

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Adiantum spp.

Maidenhair Fern

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Aegle marmelos

Quince

Conditions:

Anthuriums

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Antirrhinum spp.

Snapdragons

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Araceae

Conditions:

Including but not limited to the following ornamental genera: *Anthurium*, *Arum*, *Caladium*, *Dieffenbachia*, *Philodendron*, and *Spathophyllum* spp's. Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Plants to be less than 25 cm high and to be insecticide and fungicide treated by immersion.

Additional Declaration:

"New Zealand is free from *Xanthomonas campestris* pv. *dieffenbachiae*"

Arachis hypogaea

Peanut

Conditions:

Prohibited

Araucaria araucana

Monkey puzzle

Conditions:

Prohibited

Aronia spp.

Chokeberry

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Arundinaria spp.

Bamboo Cane

Conditions:

Prohibited

Asclepias spp.

Milkweed

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Aurantoideae

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Azalea spp.

Azaleas

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Baccharis spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Bambusaceae

Bamboo

Conditions:

Prohibited

Bellis spp.

Daisy

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Berberis spp.

Barberry

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Beta spp.

Beet

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Betula spp.

Birch

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Bombax spp.

Bombax

Conditions:

Prohibited (tropical species)

Bouvardia spp.

Bouvardias

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Brassica spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Bromeliaceae

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. For ornamental plants (other than genus *Ananas* spp.) to be less than 25 cm high. Insecticide and fungicide treatment by immersion required.

Buxus spp.

Box

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Caladium spp.

Caladiums

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment by immersion required. Plant height to be below 25 cm.

Additional Declaration:

"New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*"

Calamus spp.

Rattan

Conditions:

Prohibited

Calendula officinalis

English Marigold

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Callistephus chinensis

China Aster

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Calluna spp.

Heathe

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Camellia spp.

Camellia

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Capsicum spp.

Peppers

Conditions:

Prohibited (except for fresh and processed products).

Carica papaya

Papaya

Conditions:

Prohibited

Carpinus spp. Hornbeam
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Caryophyllaceae Carnation family
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Castanea spp. Chestnuts
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cactaceae Cacti
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cedrus spp. Cedar
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Centaurea cyanus & C. spp. Cornflowers
Conditions:
Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required. Plants to be without flowers and buds.
Treatment:
Roots to be insecticide and fungicide treated by dipping
Additional Declaration:
"Plants free from *Puccinia horiana*, and Chrysanthemum Stunt Virus"

Centrosema spp. Butterfly Pea
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Chaenomeles spp. Flowering Quinces
Conditions:
Prohibited

Chamaecyparis lawsoniana Lawson Cypress
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cheiranthus cheiri Wallflower
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Chimonobambusa spp. Bamboo
Conditions:
Prohibited

Chrysanthemum spp.

Chrysanthemums

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required. Plant height to be below 25 cm.

Additional Declaration:

"Plants free from *Puccinia horiana*, and Chrysanthemum Stunt Virus"

Citropsis spp.

Cherry Orange

Conditions:

Prohibited

Citrullus spp.

Conditions:

Prohibited

Citrus spp.

Citrus

Conditions:

Prohibited

Clausena spp.

Wampi

Conditions:

Prohibited

Clidema hirta

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cocos nucifera

Coconut Palm

Conditions:

Prohibited

Coniferae

Conifers

Conditions: (Other than *Agathis*, *Araucaria* & *Pinus* spp.)

Phytosanitary import permit required. Phytosanitary certificate required. Plants to be less than 25 cm high and must have bare roots or be rooted in authorised support (media). Insecticide and fungicide treatment by soaking is required.

Coffea spp.

Coffee

Conditions:

Prohibited (except dried beans)

Colocasia spp.

Elephants Ear/Taro

Conditions:

Prohibited (except for consumption)

Coprosma spp.

Coprosmas

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cortaderia spp.

Toetoe

Conditions:

Prohibited

Corylus spp.

Hazelnuts

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cotoneaster spp.

Conditions:

Prohibited

Crataegomespilus spp.

Bronveaux Medlar

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Crataegus spp.

Hawthorns

Conditions:

Prohibited

Cucumis spp.

Cucumber

Conditions:

Prohibited

Cucurbita spp.

Marrow

Conditions:

Prohibited

Cyathodes fasciculatus

Mingimingi

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cyclamen spp.

Cyclamen

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Cydonia spp.

Quince

Conditions:

Prohibited

Cyperus spp.

Umbrella Sedge

Conditions:

Prohibited

Cyphomandra betacea

Tamarillo

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Daemonorops spp.

Conditions:

Prohibited

Dahlia spp.

Dahlias

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Daphne spp.

Daphne

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Datura spp.

Thorn Apple

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Delphinium spp.

Delphinium

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Dendranthema spp.

Chrysanthemums

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required. Plant height to be below 25 cm.

Additional Declaration:

“Plants free from *Puccinia horiana*, and Chrysanthemum Stunt Virus”

Dendrocalumus spp.

Giant Bamboo

Conditions:

Prohibited

Dianthus caryophyllus

Carnation

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Dieffenbachia spp.

Dieffenbachia

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Plants to be insecticide and fungicide treated by immersion. Plant height to be below 25 cm.

Additional Declarations:

“New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*”

and

“Mother plants free from *Erwinia* spp., virus diseases and mycoplasma”

Digitaria spp.

Crab Grass

Conditions:
Prohibited

Dimocarpus longan

Conditions:
Prohibited

Dioscorea spp.

Yams

Conditions:
Prohibited
(except tubers for consumption).

Diospyros spp.

Persimmons

Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Durio zebithinus

Durian

Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Eichhornia crassipes

Water Hyacinth

Conditions:
Prohibited

Elephantopus spp.

Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Ensete spp.

Conditions:
Prohibited
(except in-vitro)

Eremocitrus spp.

Desert Kumquats

Conditions:
Prohibited

Erica spp.

Heath

Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Eriobotrya japonica

Loquat

Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Eriostemon spp.

Wax Flowers

Conditions:
Prohibited

Erythrina spp.

Coral Trees

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Eucalyptus spp.

Gum Trees

Conditions:

Prohibited

Euonymus spp.

Spindle Trees

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Exochorda spp.

Pearl Bush

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Fagus vulgaris

Beech

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Ficus spp.

Fig

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Fortunella spp.

Kumquats

Conditions:

Prohibited

Fragaria spp.

Strawberries

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required.

Additional Declaration:

"Mother plants and material are certified free from *Phytophthora fragariae*, Strawberry crinkle virus, Strawberry Mottle virus, and *Xanthomonas fragariae*"

Treatment:

Insecticide and fungicide treatment by immersion (particularly against *Phytophthora* spp.) required

Fraxinus spp.

Ash

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Gerbera jamisonii

Transvaal Daisy

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Glycine max

Soybean

Conditions:

Prohibited

Gossypium spp.

Conditions:

Prohibited

(except processed products).

Gramineae

Grasses

Conditions:

Prohibited

(Cereals and forage grasses including straw / unhulled grain)

Gypsophila spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Harrisia spp.

Conditions:

Prohibited

Hedera spp.

Ivy

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Helianthus spp.

Sunflower

Conditions:

Prohibited

Heliconia spp.

False Bird-of-Paradise

Conditions:

Prohibited

(except in-vitro)

Heliotropium europaeum

Heliotrope

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Hibiscus spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Hippeastrum spp.

Amaryllis

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Humulus spp. Hops
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Hydrangea spp. Hydrangea
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Hyptis emoryi Desert Lavender
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Ipomoea batatas Kumara
Conditions:
Prohibited
(except for consumption)

Jasminum spp. Jasmine
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Juglans spp. Walnuts
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Juniperus spp. Juniper
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Kerria spp. Japanese Rose
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Kortalsia spp.
Conditions:
Prohibited

Larix spp. Larch
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Laurus spp. Sweet Bay/Laurel
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Leguminosae

Conditions:

Prohibited

(Bean, Pea, Soybean, and forage legumes including but not limited to *Phaseolus* spp., *Pisum* spp., *Glycine* spp., and *Vicia* spp.)

Leucaena spp.

Leucaena

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Leucopogon spp.

Heath (Otago)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Ligustrum spp.

Privet

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Linum spp.

Flax

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Litchi chinensis

Lychee

Conditions:

Prohibited

Lonicera spp.

Honeysuckle

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Lycopersicon spp.

Tomato

Conditions:

Prohibited

Maclura spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Mahonia aquifolium

Holly Barberry

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Mahonia spp.

Oregon Grape

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Malcomia maritima

Virginia Stock

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Malus spp.

Apple

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required.

Dormant plants without leaves, flowers or fruit. Material from an approved nursery. Plants must have bare roots (washed and cleaned), treated with insecticide and fungicide by immersion.

Additional Declaration:

“Plants sourced from a nursery where fireblight (*Erwinia amylovora*) has not been observed for at least 2 years and situated at least 5 km from other sources. Mother plants indexed and found free from chlorotic leafspot virus, Plum pox virus, Prunus necrotic ringspot virus and Prunus dwarf virus”.

Malvaceae

Mallow family

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Mangifera indica

Mango

Conditions:

Prohibited

Manihot esculenta

Cassava

Conditions:

Prohibited

(except tubers for consumption).

Matthiola incane

Stock

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Mellicoccus bijugatus

Spanish Lime

Conditions:

Prohibited

Mespilus spp.

Medlar

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Morus nigra

Mulberry (Black)

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Musaceae

Banana family

Conditions: (other than those genera that are prohibited)

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Tissue culture plants are to be cultivated on sterile media without anti-biotics. Commodity class requirements.

Additional Declaration:

“Plants indexed and found free from Banana bunchy top virus, Banana streak virus, *Fusarium oxysporum* f.sp. *ubense* race IV (Panama disease), and *Ralstonia (Pseudomonas) solanacearum* race II (Moko disease)”

Narcissus spp.

Daffodil

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Nephelium lappaceum

Rambutan

Conditions:

Prohibited

Nerium spp.

Oleander

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Nothofagus spp.

NZ Beech

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Opuntia spp.

Prickly pear/Cholla cactus

Conditions:

Prohibited

Orchidaceae

Orchids

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Plants to be bare rooted with soil and humus completely removed. Insecticide and fungicide treatment required.

Additional Declaration: (For Vanilla Orchid plants only)

“New Zealand is free from Vanilla potyvirus”

or

“Vitro plants indexed and free from potyvirus”

Palmae

Palms

Conditions: (Including Oil Palms (*Elacia* spp.) and ornamental types that are not prohibited).

The following ornamental genera are prohibited: *Calamus*, *Daemonorops*, *Kortalsia* spp. Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Plants to be bare rooted with soil removed. Insecticide and fungicide treatment required.

Additional Declaration:

“New Zealand is free from Cadang-cadang and lethal yellowing diseases”

Pamburus spp.

Conditions:

Prohibited

Panicum miliaceum

Conditions:

Prohibited

Millet

Papaver nudicaule

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Iceland Poppy

Passiflora spp.

Conditions:

Prohibited

Passionfruit

Pelargonium spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Geranium

Persea americana

Conditions:

Prohibited

Avocado

Phaseolus spp.

Conditions:

Prohibited

Bean

Philadelphus spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required.

Mock Orange

Phoenix spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required. Plants must have bare roots (washed and cleaned free of soil)

Additional Declaration:

“New Zealand is free from Cadang-cadang viroid and Palm lethal yellowing”

Treatment:

Treated with insecticide and fungicide.

Date Palm

Phyllostachys spp.

Conditions:

Prohibited

Bamboo

Picea spp.

Conditions:

Spruce

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Pinus spp.

Pine

Conditions:

Prohibited

Piper nigrum

Black Pepper

Conditions:

Prohibited

Pisum spp.

Pea

Conditions:

Prohibited

Planera spp.

Water Elm

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Platanus spp.

Plane Tree

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Podocarpus totara

Totara

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Poncirus spp.

Trifoliolate Orange

Conditions:

Prohibited

Populus spp.

Poplars

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Prunus spp.

Stone fruit

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Dormant plants without leaves, flowers or fruit. Material from an approved nursery. Plants must have bare roots (washed and cleaned), treated with insecticide and fungicide by immersion.

Additional Declaration:

“Plants sourced from a nursery where fireblight (*Erwinia amylovora*) has not been observed for at least 2 years and situated at least 5 km from other sources. Mother plants indexed and found free from Prunus necrotic ringspot virus, Chlorotic leafspot virus and Prunus dwarf virus”

Pseudosasa spp.

Bamboo

Conditions:

Prohibited

Pseudotsuga spp.

Douglas Firs

Conditions:

Prohibited

Ptelea spp.

Shrubby Trefoil

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Pyracantha spp.

Fire Thorns

Conditions:

Prohibited

Pyrus spp.

Pear & Nashi

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Dormant plants without leaves, flowers or fruit. Material from an approved nursery. Plants must have bare roots (washed and cleaned), treated with insecticide and fungicide by immersion.

Additional Declaration:

"Plants sourced from a nursery where fireblight (*Erwinia amylovora*) has not been observed for at least 2 years and situated at least 5 km from other sources. Mother plants indexed and found free from Prunus necrotic ringspot virus, Chlorotic leafspot virus and Prunus dwarf virus"

Ravenala spp.

Traveller's Palm

Conditions:

Prohibited

(except in-vitro)

Rhamnus spp.

Buckthorns

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Rhododendron spp.

Rhododendrons

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Rosa spp.

Roses

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required. The plants must be young dormant plants without leaves, flowers or fruit. Plants must be bare rooted, washed and cleaned.

Treatment:

Treated by immersion with insecticide and fungicide

Salix spp.

Willow

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Salvinia spp.

Salvinias

Conditions:

Prohibited

Sandersonia spp.

Sandersonias

<u>Syzygium jambos</u> <u>Conditions:</u> Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.	<u>Rose Apple</u>
<u>Theobroma spp.</u> <u>Conditions:</u> Prohibited (except roasted beans)	<u>Cacao</u>
<u>Tilia spp.</u> <u>Conditions:</u> Prohibited	<u>Lime Tree</u>
<u>Tulipa spp.</u> <u>Conditions:</u> Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.	<u>Tulips</u>

Ulmus spp. Elms
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Vaccinium corymbosum Blueberry
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Verbena spp.
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Viburnum spp. Viburnum
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Vicia spp. Vetch
Conditions:
Prohibited

Viola spp. Violets/Pansies
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Vitis spp. Grape
Conditions:
Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. All propagative material (grafts, scions, and plants), must be taken from nurseries approved by INRA or mother plants to be indexed. All material must be dormant without leaves, fruit or flowers. Plants must be bare rooted (washed and cleaned). Insecticide and fungicide treatment by dipping is required.
Additional Declaration:
"Material coming from indexed mother plants and certified free from *Eutypa armeniacae* (*Phomopsis viticola*) and Esca disease, Flavescence doree mycoplasma, Court noue virus, Leaf curl virus, *Erwinia vitivora*, *Xylella fastidiosa* (Pierce's disease), and *Viteus vitifoliae* (Phylloxera)"

Watsonia spp. Bugle Lily
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Wisteria spp. Wistaria
Conditions:
Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Xanthosoma spp. Taro
Conditions:

Prohibited
(except for consumption)

Zelkova serrata

Japanese Zelkova

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Zingiber officinale

Ginger

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

Zinnia spp.

Zinnias

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required.

4.3.3 Tissue Culture (In vitro plants)

Refer Section 3.3.4

4.4 Seeds (grain) and Nuts

Refer to Sections 3.4 for General Commodity Class Requirements.

4.4.1 Seeds for Sowing (General Groups)

Fruit, vegetable, ornamentals, and forest plants:

Conditions: (Other than those subject to special declarations or that are prohibited).

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required - except for commercial seed presented in small packages.

Gramineae

Forage grass seed

Conditions:

Refer Sections 3.4.2 and 4.4.2

Leguminosae

Forage legumes

Conditions:

Refer Sections 3.4.3 and 4.4.3

4.4.2 Seed for Sowing (Specific)

Acacia spp.

Wattles

Conditions:

Prohibited

Aeglopsis spp.

Conditions:

Prohibited

Afraegle spp.

Conditions:

Prohibited

Agaricus bisporus

Mushroom Spawn

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Mushroom mycelium for cultivation (base medium) has to have been sterilised by heat.

Agathis spp.

Kauri

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Insecticide and fungicide treatment (by soaking) required.

Agave spp.

Century Plants

Conditions:

Prohibited

Agrostis spp.

Bent Grass

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Allium spp.

Onions

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment by fumigation required for control of smut and mildew.

Additional Declaration:

“Seeds are free from *Peronospora destructor* (onion mildew) and the field of origin is free from *Urocystis cepulae* (onion smut)”

Alopecurus pratensis

Meadow

Conditions:

Plant import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Anthurium spp.

Anthurium

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Disinfection with Sodium hypochlorite.

Additional Declaration:

“New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*”

Arachis hypogaea

Peanut

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment (for control of *Puccinia arachidica*) required.

Araucaria araucana

Monkey Puzzle

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Insecticide and fungicide treatment (by soaking) required.

Arum spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Disinfection with Sodium hypochlorite.

Additional Declaration:

“New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*”

Avena spp.

Oats

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required
Insecticide and fungicide treatment (triadimenol or carboxin for smut) required.

Borago officinalis

Borage

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required.

Brassica spp.

Brassicas

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Bromus spp.

Prairie grass

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Calamus spp.

Conditions:

Prohibited

Caldium spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Disinfection with Sodium hypochlorite.

Additional Declaration:

“New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*”

Chaenomeles spp.

Conditions:

Prohibited

Flowering Quince

Citropsis spp.

Conditions:

Prohibited

Cherry Orange

Citrus spp.

Conditions:

Prohibited

Citrus

Clausena spp.

Conditions:

Prohibited

Wampi

Cocos nucifera

Conditions:

Prohibited

Coconut

Cortaderia spp.

Conditions: (Other than those subject to special declarations or that are prohibited).

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Toetoe

Cotoneaster spp.

Conditions:

Prohibited

Rock Spray

Crataegus spp.

Conditions:

Prohibited

Hawthorn

Cydonia spp.

Conditions:

Prohibited

Quince

Cynosurus cristatus

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Dogtail

Dactylis glomerata

Cocksfoot

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Dichondra repens

Mercury Bay Weed

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required.

Daemonorops spp.

Conditions:

Prohibited

Diffenbachia spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Disinfection with Sodium hypochlorite.

Additional Declaration:

“New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*”

Eremocitrus spp.

Desert Kumquat

Conditions:

Prohibited

Eriostemon spp.

Wax flower

Conditions:

Prohibited

Eucalyptus spp.

Gum tree

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Seeds must be ungerminated. Treatment required.

Festuca spp.

Gramineae

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited: Insecticide treatment required. Certificate of purity and certificate of germination required.

Fortunella spp.

Kumquat

Conditions:

Prohibited

Glycine max

Soybean

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required.

Additional declaration:

“Seeds are free from Soybean mosaic virus, *Heterodera glycines*, *Peronospora manshurica*, and *Xanthomonas campestris* pv. *glycine*”

Gossypium spp.

Cotton

Conditions:

Prohibited
(except processed products)

Harrisia spp.

Harrisia

Conditions:

Prohibited

Helianthus spp.

Sunflower

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment with insecticide and fungicide (anti-mildew treatment a.i. metalaxyl).

Additional Declaration:

“The area of production is free from *Plasmopara halstedii* (sunflower mildew)”

Hordeum vulgare

Barley

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required.
Insecticide and fungicide treatment (triadimenol or carboxin for smut) required.

Lentinus edodes

Shitake Mushroom Spawn

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Mushroom mycelium for cultivation (base medium) has to have been sterilised by heat.

Linum usitatissimum

Linseed

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required.

Lolium spp.

Rye Grass

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Lotus spp.

Lotus

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited a fungicide and insecticide treatment is required. Certificate of purity and certificate of germination required.

Lupinus spp.

Lupin

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Lycopersicon esculentum

Tomato

Conditions: (Other than those subject to special declarations or that are prohibited).

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Mangifera indica

Mango

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment required.

Additional Declaration:

"New Zealand is free of *Xanthomonas campestris* pv. *mangiferae*"

Medicago sativa

Lucerne

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Fungicide and insecticide treatment required. Certificate of purity and certificate of germination required.

Additional Declaration:

"Seeds certified free from *Corynebacterium michiganensis* pv. *insidiosum*"

NB. *Corynebacterium insidiosum* is also known in NZ as *Clavibacter michiganensis* pv. *insidiosus*

Melilotus spp.

Sweet Clover

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited: Insecticide treatment is required. Certificate of purity and certificate of germination required.

Opuntia spp.

Prickly Pear

Conditions:

Prohibited

Oryza sativa

Rice

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment required. Hot water treatment at 53°C for 15 minutes (anti-bacterial).

Additional Declaration:

“The area of production is free from *Aphelenchoides besseyi*, *A. oryzae*, and *Xanthomonas campestris* pv. *oryzicola*, and the seeds are free from *Pyricularia oryzae*”.

Pamburus spp.

Conditions:

Prohibited

Paspalum spp.

Paspalum

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited: Insecticide treatment is required. Certificate of purity and certificate of germination required.

Passiflora spp.

Passionfruit

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Phaseolus vulgaris

Bean

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Insecticide and fungicide treatment by dusting required.

Persea americana

Avocado

Conditions: Only enterable into New Caledonia by special derogation (plant import permit) for research purposes only. In addition a phytosanitary certificate and the following additional declarations are required. Seeds must be ungerminated.

Additional Declarations:

“Orchard and mother plants are free from Avocado Sunblotch Viroid (ASV)”

Phalaris spp.

Canary Grass

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Philodendron spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Disinfection with Sodium hypochlorite.

Additional Declaration:

“New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*”

Phleum spp.

Timothy Grass

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Pinus spp.

Conditions:

Phytosanitary import required. Phytosanitary certificate required. Insecticide and fungicide treatment (by soaking) required.

Pisum spp.

Pea

Conditions:

(Other than those subject to special declarations or that are prohibited). Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Poncirus spp.

Trifoliolate Orange

Conditions:

Prohibited

Pyracantha spp.

Fire Thorns

Conditions:

Prohibited

Rosa spp.

Rose

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Secale cereale

Rye

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Insecticide and fungicide treatment (triadimenol or carboxin for smut) required.

Solanum tuberosum

Seed Potato

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Treatment required. Must be free from soil, live insects and diseases.

Treatment:

Insecticide and fungicide treatment required.

Sorbus spp.

Mountain Ash

Conditions:

Prohibited

Sorghum spp.

Sorghum

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

"The area of production is free from *Peronosclerospora sorghi* and *P. maydis*"

Treatment:

Treatment with insecticide and fungicide (anti-mildew treatment a.i. metalaxyl)

Spathiphyllum spp.

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Disinfection with Sodium hypochlorite.

Additional Declaration:

"New Zealand free from *Xanthomonas campestris* pv. *dieffenbachiae*"

Stranvaesia spp.

Stranvaesia

Conditions:

Prohibited

Swietenia spp.

Mahogany

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Seeds must be ungerminated.

Treatment:

Insecticide and fungicide treatment by dusting or dipping required.

Tectona spp.

Teak

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required.

Seeds must be ungerminated. Insecticide and fungicide treatment by dusting or dipping required.

Trifolium spp.

White Clover

Conditions:

Phytosanitary import permit required. Phytosanitary certificate required. Other than those seeds subject to special declarations or that are prohibited an insecticide treatment is required. Certificate of purity and certificate of germination required.

Triticum spp.

Wheat

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment (triadimenol or carboxin for smut) required.

Vicia faba

Broad Bean

Conditions:(Other than those subject to special declarations or that are prohibited).

Phytosanitary import permit required. Phytosanitary certificate required. Must be free from soil, live insects and diseases. Insecticide and fungicide treatment required except for commercial seed presented in small packages.

Zea mays

Maize

Conditions:

Phytosanitary permit required. Phytosanitary certificate and additional declaration required. Insecticide and fungicide treatment against smut fungi (Vitavax, Baytan IM) and Downy Mildew (Apron, Ridomyl) is compulsory.

Additional Declaration:

“New Zealand is free from *Erwinia stewartii*, *Ustilago maydis*, *Peronosclerospora maydis*, *Peronosclerospora philippinensis*, *Peronosclerospora sacchari*, and *Peronosclerospora sorghi*.” NB. *Ustilago maydis* = *Ustilago zea*.

4.4.3 Seeds (grain) and Nuts for Consumption

Arachis hypogaea

Peanut

Shelled or unshelled

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Devitalisation treatment required or by formal import agreement between the NPPO and the importer.

Treatment:

Either

By autoclave at 100 Kpa at 118° Celsius for 30 min

or

By heat treatment at 85° Celsius for 12 Hours and 40% RH”

Castanea sativa

Chestnut

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Coffea spp.

Coffee

Conditions:

Prohibited
(except dried coffee beans)

Corylus spp.

Hazelnut

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Dried Grains

Conditions: (including: barley, corn, oats, rice and wheat [cereals], maize grits (semolina))
Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. Other than those subject to special declarations or which are prohibited. Free from insect pests, subject to inspection on arrival, fumigation is compulsory if live insects occur. Dry grain is to be devitalised if the origin is from South East Asia.

Additional Declaration:

“New Zealand is free from *Prostephanus truncatus*, and *Trogoderma granarium* (Khapra beetle)”

or

Treatment by fumigation (details to be entered on phytosanitary certificate)

Juglans spp.

Walnut

Shelled or unshelled

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Sorghum vulgare

Sorghum

Conditions:

Plant import permit required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

“The area of production is free from *Peronosclerospora sorghi* and *P. maydis*”

Zea mays

Maize

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Grains for human consumption (including popcorn)

Additional Declarations:

“New Zealand is free from *Erwinia stewartii*, *Peronosclerospora maydis* *Peronosclerospora philippinensis*, *Peronosclerospora sacchari*, *Peronosclerospora sorghi* and *Ustilago maydis*”
NB. *Ustilago maydis* = *Ustilago zea*.

and

“New Zealand is free from *Prostephanus truncatus* and *Trogoderma granarium* (Khapra beetle)”

4.5 Growing Media

ref Permit

Bark

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and treatment required.

Treatment:

Fumigation with Methyl Bromide 250g/m³ for 24hrs at 21°C

Compost

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and treatment required.

Treatment:

Fumigation with Methyl Bromide 250g/m³ for 24hrs at 21°C

Peat Moss/Peat

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and treatment required.

Treatment:

Fumigation with Methyl Bromide 250g/m³ for 24hrs at 21°C

Sand

Conditions:

Phytosanitary import permit and Phytosanitary certificate required. Sand to be washed, sieved, and free from soil and plant debris.

Soil

Conditions:

Prohibited

Sphagnum spp.

Sphagnum Moss

Conditions:

Phytosanitary import permit and Phytosanitary certificate required.

Straw

Conditions:

Prohibited

4.6 Miscellaneous

Cattle Cake

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Inspection on arrival and fumigation if required.

Cocos nucifera

Coconut fibre

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required.

Treatment:

Fumigation with Methyl Bromide or sterilisation by heating

Cocos nucifera

Copra

Conditions:

Phytosanitary import permit required. Phytosanitary certificate and additional declaration required. Treatment required.

Treatment:

Fumigation with Methyl Bromide

Manure

Conditions:

Prohibited

Grains for animal feed (Whole grains crushed, processed and heat treated)

Conditions:

Phytosanitary import permit or phytosanitary certificate not required.
