Dear Sir

### Indigenous Timber Milling Statement

Please find attached an INDIGENOUS TIMBER MILLING STATEMENT, which provides for the milling of indigenous timber.

No. 7-00-02342 405.5 m<sup>3</sup> Kauri

The approved volume is log roundwood volume.

This statement does not give a right to access land or a right to the ownership of indigenous timber.

#### Milling of indigenous timber

Sawmills milling indigenous timbers are required to be registered under the Forests Act 1949. The sawmiller should receive a copy of the Milling Statement.

It is your responsibility to ensure that you meet any other regulatory requirements. Before harvesting, you should check with your relevant Regional or District Council for any compliance requirements with Regional and/or District Plans under the Resource Management Act 1991.

Yours faithfully

### General Conditions:

- This statement allows the timber listed above to be milled at any sawmill registered to mill indigenous timber under section 67D(1) of the Forests Act 1949.
- This statement does not confer right, title or ownership to the timber described above.
- Before any felling or harvesting you should check with your relevant Regional or District Council for any resource consent/compliance requirements for such activity under the relevant Regional and/or District Plans.

### Other Conditions:

- For logs extracted from non-indigenous land from the above property. If timber is removed from indigenous land the legality of subsequent milling and export of all timber from the above property may be jeopardised

Milling Statement Decision Recommendation	
<b>Milling Statement Reference No.</b>	7-00-02342
<b>Applicant</b>	M & S Swamp Kauri Ltd
<b>Date Received</b>	9/07/2015
<b>Forests Act 1949 Part 3A Section 67D</b>	<p>(b) the Secretary has stated in writing that he or she is satisfied that—</p> <p>(iv) the timber is salvaged timber that has been or will be harvested from an area of land that is not indigenous forest land</p>
<b>Applicant has Authority to Apply</b>	The applicant has supplied a signed note from the landowner giving them permission to extract logs and stumps from their property. I am satisfied the applicant has the authority to apply.
<b>Application Evidence</b>	<p>The applicant has provided a signed note from the landowner, photographs of the extraction, and a copy of the land title.</p> <p>A new land title was sourced from landowner s 9(2)(a) provided some photographs of the site that were taken by himself.</p>
<b>Site Inspection Undertaken</b>	<p> Extraction Site inspections.docx</p> <p>Site inspection conducted on 24/07/2015 by s 9(2)(a) s 9(2)(a)</p> <p>This site has previously had timber extracted under milling statement 7-00-01704. The historical activity has resulted in the soil becoming more waterlogged than previously, and some indigenous grasses have established. However ryegrass and buffalo grass are by far the dominant vegetation.</p> <p>The timber is being removed as it is extracted and could not be inspected. However a detailed inventory has been provided which will be able to be checked when forestry officers conduct sawmill inspections.</p> <p>Based on this inspection I am satisfied the timber being has been harvested from an area of land that is not indigenous forest land.</p>
<b>Recommendation</b>	<p>A milling statement (number 7-00-01704) was previously approved for swamp kauri coming from this property. During the operations the applicant extracted more swamp kauri than originally expected.</p> <p>A site inspection was previously done by s 9(2)(a) who can confirm that the timber being extracted was swamp kauri, and that it was not being extracted from indigenous forest land. The dominant vegetation pre-extraction was gorse.</p> <p>An additional inspection was done on 24/07/2015 (see above).</p>

s 9(2)(a) filenote

**Swamp Kauri Extraction Sites.**

On 24/07/2015 MPI Forestry Officers s 9(2)(a) inspected two sites from which swamp kauri had been extracted.

These inspections were done as part of the Milling Statement approval process, in order to establish that the timber being applied for has been harvested from an area of land that is not indigenous forest land (Section 67D(1)(b)(iv) of the Forests Act 1949). The results of these inspections are detailed below.

**7-00-02337** s 9(2)(a)

The s 9(2)(a) property had been rehabilitated before the inspection. The extraction site was consistent with the aerial photographs included with the application (previously deer paddocks). There was no indigenous vegetation present in the paddock, or amongst the stacked vegetation (from the removed shelter belts). The landowner noted that the drainage of the paddock had been affected by extraction and was now significantly more waterlogged.

The extracted timber has been removed (except for three stumps), and could not be inspected. However a detailed inventory has been provided which will be able to be checked when forestry officers conduct sawmill inspections.

Based on this inspection I am satisfied the timber being has been harvested from an area of land that is not indigenous forest land.

**7-00-02342 (M&S Swamp Kauri Ltd)**

This site has previously had timber extracted under milling statement 7-00-01704. The historical activity has resulted in the soil becoming more waterlogged than previously, and some indigenous grasses have established. However ryegrass and buffalo grass are by far the dominant vegetation.

The timber is being removed as it is extracted and could not be inspected. However a detailed inventory has been provided which will be able to be checked when forestry officers conduct sawmill inspections.

Based on this inspection I am satisfied the timber being has been harvested from an area of land that is not indigenous forest land.
