

WORK PROGRAMME THEMES

High quality, independent advice

One Billion Trees - More Trees planted

- “Right tree (exotic & native), place, purpose & scale”
- Biodiversity & habitats restored
- Cleaner water

More value added to trees on-shore

- Improved market access & processor competitiveness
- Infrastructure for efficient supply chains
- Cleaner water, less soil lost
- “Wood first”

Climate change resilience & adaptation

- ETS incentives
- Hazards forecasting & resilience through forestry systems

Regions prosper through forestry

- Meaningful local work
- Increased services to remote communities
- Resilience built through forestry systems
- Fiscally efficient path to meet Paris21

OUTCOMES

Forestry 2050 Vision

New Zealanders' wellbeing enhanced through forestry. A cohesive, progressive forest industry supporting the transition to a resilient, export competitive, low-carbon bioeconomy.

ENABLERS

Social licence

- Secure & maintain community support
- Public misconceptions of *Pinus radiata*

Science and technology

- Productivity gains
- Low impact harvesting
- Proactive biosecurity
- Address public

Skilled workforce

- Demand planning
- Training
- Career perceptions & pathways
- Health & safety

Māori development

- Under-utilised land
- Remote districts
- Governance
- Partnerships across forestry supply chain

Public policy & market access

- ETS
- Zero Carbon 2050
- Biodiversity NPS
- Standards
- Trade agreements
