

Compensation vs Operational

Examples where losses and costs may occur due to the *Mycoplasma bovis* Response

Compensation Loss	Operational Cost
<p>You may be eligible to claim compensation if you have incurred a loss due to the Ministry for Primary Industries (MPI) exercise of powers or restrictions under the Biosecurity Act 1993 (the Act) section 162A.</p> <p>Examples include damage to or destruction of property and losses as a result of restrictions imposed on the movement or disposal of goods (e.g. animals). Refer to www.mbovis.govt.nz 'Costs & Compensation' section for relevant frequently asked questions (FAQs) and a compensation claim form.</p>	<p>You can apply for support for some on-farm operational costs if there is an urgent need (such as feed shortages) or to meet MPI's requirements.</p> <p>Costs need pre-approval before the expenditure is incurred. Work with your Incident Control Point (ICP) Manager and the MPI Regional Recovery team, who will help you to have these approved.</p>
Beef Production Loss	Equipment Hire
<p>Compensation Loss – MPI's exercise of powers have incurred a loss, such as a Notice of Direction (NOD) to destroy your stock earlier than usual (and at a lesser weight).</p> <p>You are eligible to claim compensation for future loss of meat production due to MPI's direction.</p> <p>Please refer to the Beef Production Loss and Stock Destruction FAQs for more details</p>	<p>Operational Cost – when hiring additional farm equipment is required to ensure animal welfare and for farming operations to continue.</p>
Bull Servicing Income	Feed
<p>Compensation Loss – you have incurred a loss due to an exercise of powers. For example, the bulls were prevented from moving off and/or on the farm due to a NOD or a Restricted Place (RP) notice.</p> <p>Please refer to the Bull Servicing, Movement Restriction FAQs for more details.</p>	<p>Operational Cost – when feed is required to ensure the welfare of animals under movement restriction or where the animals cannot be moved off the property.</p>
Cleaning	Fencing
<p>Operational Cost – costs associated with additional cleaning that is required under a NOD and/or RP notice.</p> <p>Any costs associated with cleaning an infected property will be managed by your ICP manager, and Cleaning and Disinfection (C&D) coordinator.</p>	<p>Operational Cost – existing fencing is not adequate to contain animals for the protection of neighbouring farms.</p> <p>Costs may include hiring additional casual labour and/or temporary fencing materials.</p>
	Milk Production
	<p>Compensation Loss – MPI's powers must have caused you a consequential loss in milk production. For example, either by a direction to destroy the dairy herd or movement controls placed on the farm has disrupted milk production.</p> <p>Please refer to the Milk Production FAQs for more details.</p>

Mustering

Operational costs – when you are required to muster cattle for the purposes of census or for each round of sampling. The farm must be under surveillance or Section 122 NOD restrictions.

Please **request a Mustering Payments fact sheet** from your ICP manager or Regional Recovery team manager or refer to the website.

Stock Destruction

Compensation loss – when you were issued a NOD to destroy your stock. Loss from stock destruction is calculated from the total value of animals, less meat value received from the meat processor.

Please refer to the **Beef Production Loss and Stock Destruction FAQs** for details.

Stock Replacement

Compensation loss – your loss may have been caused by the price for replacement stock has increased between the date your infected stock were culled and the date when you were able to restock the farm.

Please refer to the **Stock Replacement Higher Market Prices FAQ** for more details.

Transport

Operational costs – may include the following:

- When transporting stock to the meat processors and specific *M. bovis* C&D of the stock truck.
- *M. bovis* processing charges incurred from the meat processor (unless already paid by MPI).
- Cost for transporting replacement stock if you were issued a NOD to destroy your original stock.

Vet Charges

Operational costs – you may be reimbursed or MPI may pay for certifying that your animals are fit for transport.

PROCESS

Please refer to compensation or operational teams for more information.

COMPENSATION – if you have experienced a **loss** due to an exercise of powers by MPI, you will need to submit a completed compensation claim form and send it to MPI Compensation.

For general information about compensation under Section 162A of the Biosecurity Act 1993 or for a copy of the compensation claim form, contact:

Tel: 0800 00 83 33

Email: compensationcoordinator@mpi.govt.nz

Website: www.mpi.govt.nz/bovis

OPERATIONAL – if you have an outstanding operational cost or require more information, please contact your ICP manager or MPI Regional Recovery team manager.

Tel: 0800 00 83 33

Email: MBovis2017_ART@mpi.govt.nz

Website: www.mpi.govt.nz/bovis
