

CTO Direction to MPI Inspector

Equivalent measures for consignments non-compliant with VEHICLE-ALL

CTO direction code for recording in Quantum: CTO Plants: 20170038

Pursuant to section 27(1) (d) (iii) of the Biosecurity Act 1993 I, give the following direction for measures in the paragraphs below, different from those required by section 4.3 in the import health standard (IHS): Vehicles, Machinery and Tyres — VEHICLE-ALL, that may be applied for biosecurity clearance of a consignment imported by Pinnacle Marine, Ltd, from Italy.

For consignment of an Azimut craft model Magellano 43:

- a) The craft is to be treated at an MPI approved transitional facility using 1 can of aircraft hold spray. The doors, hatches, and lockers are to be opened and left open during treatment, spray applied and the doors closed for at least 6 hours.
- b) After treatment, an inspection is required by an MPI Inspector during the devanning process. If live insects are found, treatment will be required as per the Approved Biosecurity Treatment schedule (ABTRT).
- c) All other sections of VEHICLE-ALL IHS must be complied with.

This direction takes effect from 13 December 2017 and applies to the above consignment arriving from Italy.
